Summary

Aspiring DevOps Engineer and BSc. (Hons) Computer Science undergraduate at University of Westminster, currently pursuing studies through Informatics Institute of Technology (IIT). Passionate about cloud infrastructure, automation, and full-stack development, with hands-on experience in containerization, CI/CD pipelines, and deployment workflows using Docker, GitHub Actions, and cloud platforms including Vercel, Render, and Cloudflare Pages. Skilled in Flutter mobile app development, SQL databases, React, Node.js, TypeScript, Python, and Git-based collaboration workflows. Experienced in developing scalable applications, managing Linux environments, and collaborating effectively in team-based projects. Committed to applying DevOps practices and problem-solving skills to build reliable, efficient, and modern software systems.

Education

BSc (Hons) Computer Science University of Westminster - via IIT Sri Lanka	Jan 2025 – Sep 2028
International Advanced Level (IAL) - Mathematics Stream Results: B - Mathematics C - Physics C – Chemistry	Jan 2024 – Jan 2025
Dharmapala Vidyalaya Pannipitiya - GCE Ordinary Level (O/L) Results: 9A	2022(2023)

Technical Skills

- DevOps & Cloud: Docker, CI/CD Concepts, GitHub Actions, Containerization, Application Deployment
- Programming & Scripting: Python, JavaScript, TypeScript, Java
- Mobile & Web Development: Flutter, React, Node.js, HTML, CSS
- Databases & Backend: SQL, Firebase, REST APIs
- Version Control: Git, GitHub, Branch-based Development Workflows
- Tools & Platforms: Linux (Basic Administration), CLI, Vercel, Render, Cloudflare Pages

Projects

MediGo - Ambulance Fleet Management System

Technologies: Flutter, React, TypeScript, Node.js, Firebase, GitHub Actions, Vercel

GitHub: <https://github.com/SDGP-03/MediGo> | Live: <https://medigolk.vercel.app/>

Built a smart ambulance fleet management system to improve emergency dispatch efficiency.

- Developed a cross-platform driver app (Flutter) and admin dashboard (React + TypeScript).
- Built CI/CD pipelines with GitHub Actions for automated build, test, and deployment.
- Integrated Firebase for real-time data, authentication, and backend services.
- Collaborated using Git workflows (PRs, code reviews) in a team environment.

Pet Clinic Management System (Full-Stack Web App)

Technologies: React (Vite), Node.js, Express.js, Firebase, Docker, GitHub Actions, Cloudflare Pages, Render

GitHub: <https://github.com/kavinu1/pet-clinic> | Live: <https://pawlk.pages.dev/>

- Engineered a scalable full-stack pet clinic system using React and Express.js.
- Secured user access with Firebase Authentication and role-based authorization.
- Designed and deployed containerized applications using Docker and Docker Compose.
- Automated build and deployment workflows with GitHub Actions (CI/CD).

InnerSage - Climate Action Awareness Website (UN SDG 13)

Technologies: HTML, CSS, JavaScript

GitHub: <https://github.com/kavinu1/innersage> | Live: <https://innersage.xyz>

- Built a responsive climate awareness platform supporting UN SDG 13 (Climate Action).
- Delivered educational content on climate change and sustainability practices.
- Ensured cross-device compatibility using modern HTML, CSS, and JavaScript.
- Automated validation and deployment using GitHub Actions workflows (W3C validation, Jekyll Pages, static checks).

Portfolio Website (Vite React TS)

Technologies: React (Vite), TypeScript, HTML, CSS, GitHub, Cloudflare Pages

GitHub: <https://github.com/kavinu1/Portfolio.git> | Live: <https://kavinu.pages.dev/>

- Developed a modern personal portfolio using React (Vite) and TypeScript.
- Designed responsive and user-friendly UI to showcase projects and skills.
- Implemented reusable components and optimized performance for fast loading.
- Integrated smooth navigation and clean layout for better user experience.
- Deployed production-ready application on Cloudflare Pages with GitHub integration.

Certifications

- DevOps 101 Bootcamp
CoDeKu DevOps Academy | May 2026 | [Link](#)
- Docker Beginners Guide
CoDeKu DevOps Academy | September 2025 | [Link](#)
- AWS Cloud Practitioner Essentials
Amazon Web Services | June 2026 | [Link](#)
- Microsoft Azure AI Fundamentals
Microsoft | March 2025 | [Link](#)
- Oracle Java Foundations
LinkedIn Learning | June 2025 | [Link](#)
- Python Essential Training
LinkedIn Learning | March 2025 | [Link](#)
- Data Science Math Skills
Duke University | November 2023 | [Link](#)

Currently Learning

- Built CI/CD pipelines using GitHub Actions for automated workflows.
- Containerized applications using Docker for consistent deployment.
- Deployed applications on Vercel, Netlify, Cloudflare Pages, and Render.
- Worked with Linux CLI for basic system operations.
